port, which recommended that the gov-ernment should not only supply coal and oil for its own vessels, but should sell them to merchant shipping. The eyisting commissary, manufacturing plant and laundry, it was urged, should be continued for the benefit of govern-ment forces, and government owner-ship of public utilities was proposed in a recommendation that the commis-sary furnish all these things to shipin a recommendation that the commis-sary furnish all these things to ship-ping passing through the canal for a consideration. It was suggested that the government should sell tools and appliances needed by ships, still an-other forward movement, should ac-tually undertake to dock and repair tually undertake to dock and repair whips in the neighborhood of the canal. For that purpose the construction of a fry dock and a machine shop was recommended, and it was policed out that these would be available for the use of our navy. A wireless station for naval and commercial use was another adjunct required.

The Land Problem.

The commission has given much thought to the disposition of land in the Canai Zone, important because of its bearing upon the future administratio of the zone and the operation of the canai. Of the 436 square miles of land in the zone, the government owns 263, of which ninety-six miles are occupied by the canai. A large part of the government land will be required for military, naval and other official purposes. It was deemed essential that the Spanish law shall continue to prevail to prevent friction

ccupants than Americans are not de-trable. The commission wants to get id of the great body of foreign labor-rs, who were imported to dig the canal, a soon as the work is completed. They low populate the established town ites, and the commission declared hat they should be repatriated after fork no longer can be given them. It has stated that the greater the amount of land leased and the number of town greater will be the cost of sanitation and civil government.

The report declared that for several years to come at least it should be the policy to keep all government lands for government purposes. Whatever military force is located on the Isthmus will be charged with its own sanitation. The reservation of all lands for governmental use would result, therefore, in minimum cost for these two items.

As to the form of government for the

items.

As to the form of government for the zone, the commission directed special attention to the military necessities, the canal being deemed a military asset, in conclusion, the commission holds it essential that an entity be established, so organized that any military contingency can be promptly met.

It was recommended that Congress authorize the canal management to pay damage to vessels injured in passage, inasmuch as the government must insist on taking complete charge of all vessels during that transit, to guard against injury to the locks.

Why is the soda cracker to-day such a universal food?

People ate soda crackers in the old days, it is true—but they bought them from a barrel or box and took them home in a paper bag, their crispness and flavor all gone.

To-day there is a soda cracker which is the recognized staple - Uneeda Biscuit.

Uneeda Biscuit are the most nutritious food made from flour and should be eaten every day by every member of the family from the youngest to the oldest.

White Married Man Locked Up Following Alleged Attack.

Raleigh, N. C., October 16 .- J. K. Jones, a white married man, is locked up in Rocky Mount (Nash county) jail to-night, and the building is guarded as a precaution against possible work of a mob, though no attempt at lynching is seriously feared by the authorities, because of the assurance the people have received that the prisoner shall have a prompt judicial hearing to-morrow.

The charge against Jones is an alleged attack upon Ethel Rice, a thirteen-year-old school girl, late this afternoon in the suburbs of South Rocky Mount, while the child was returning home from school. The scene was far removed from any house or people passing at the time. ones, a white married man, is locked

her cries, however, attracted the attention of two men driving in a buggy, who went to her assistance. Meanwhile Jones fled to nearby woods. A number of section hands coming up, and learning the little girl's story, went with an officer in pursuit. They

soon found the man, Jones, who denied he was the person sought.

Taken before the girl, she positive ly identified him, and he was hurried to jail before most people heard of the affair.

Jones to-night stoutly stuck to his story of not being the man wanted, but the child as firmly holds to her identification, and declares he is the man beyong doubt.

He will be given a preliminary hearing to-morrow morning.
